Change Your Profile Photo

You can change the photo that is displayed on your profile.

1. Sign in to the member portal (Realm).

2. Click your name in the upper-right corner and select My Profile.

3. Click the image beside your name.

4. Click New Profile Photo.

5. Select the image you want to use.

6. Adjust the image size using the slider.

7. Click Save. You may need to refresh the page to see your changes.

Note: Photo Quality

Once you add a photo, Realm makes a smaller copy and uses that version going forward. If you return to edit your profile photo later, you'll only be able to work with the smaller version, which may reduce image quality. For the best results, delete the current photo and re-upload your original image when making edits.

Ideally, the image you choose should be 172 x 172 pixels. If needed, you can use any photo or graphics program to determine and alter the size of your image.
